

About Codiario

(Last Updated August 09, 2019)

Codiario is an encrypted instant messaging software that allows users to exchange encrypted and self-destructing messages and send all types of files such as photos and videos. At the same time, the paying user can directly establish the robot customer service content, so that the customer can obtain the service provider information through Codiario artificial intelligence at any time. Rapidly, safely and effectively expand your business and reduce marketing costs.

Codiario Features:

1. Codiario uses blockchain encryption to encrypt user information. Users get a high level of security .
2. All information is automatically cleared on a regular basis, saving hardware resources and protecting privacy.
3. The user can obtain the corresponding commercial digital business card push through the robot.
4. Advocating light social concepts, avoiding indulging in social networks, or losing personal privacy due to social networks, losing real life.
